PROJECTS

Portfolio Website Dec 2024 - Present
Creating a personal website to showcase various projects in greater detail, utilizing HTML, CSS, and JavaScript.

Project April - May 2024
Managed a 6 person team while being the lead programmer and designer of a turn-based fighting game utilizing external libraries. Created collision handling, implemented each system, and organized the components of the project under a time pressure, presenting the final product to the public.

WaterWise App Prototype Mar - May 2024
Designed an app focused on water conservation, creating a mock-up to display the functionalities of the app and presenting it to the public with school board members in attendance.

Automated Guided Vehicle Mar - Apr 2024
Designed, built, and programmed a small self-navigating vehicle with a team using VEX Robotics with limited supplies and resources.
